HOLDING

Polisan Holding:

Polisan Holding has been established in 2000 in order to maintain provide coordination within among and management of the group companies, provide management for them, and to ensure those group companies operate using employ advanced techniques in the area of planning, marketing, financial affairs, financing and fund management, legal affairs, human resources, and information technology; and that the Holding continues its operations in this direction.

Subsidiaries:

Polisan Kimya Sanayii A.Ş. / Türkiye

Poliport Kimya Sanayi ve Ticaret A.Ş. / Türkiye

Polisan Yapıkim Yapı Kimyasalları Sanayi ve Ticaret A.Ş. / Türkiye

Polisan Hellas SA / Greece

Polisan Yapıkim Yapı Kimyasalları Sanayi ve Ticaret A.Ş.

Polisan Holding, which has been providing construction chemicals solutions to the construction industry since 2009, continues its activities with its new company, Polisan Yapıkim, established in 2022.

Concrete

We produce solutions that provide added value to ready-mixed concrete and precast concrete manufacturers.

Cement

We are the solution partner of the cement industry, from grinding to performance, from energy to emissions.

Underground

We are present in tunnels with our temporary shoring solutions and the chemicals we provide to tunnel boring machines.

CEMENT ADMIXTURE

STRENGTH INCREASING CEMENT ADDITIVES

POLICEM PA: POLICEM PA additives products are strength and capacity increasing cement additives used as early and final strength enhancers for all cement types. Increases quality and strength of cement. Reduces water demand of cement. Achieves high mechanical strengths for short, mid and long terms.

GRINDING AID CEMENT ADDITIVES

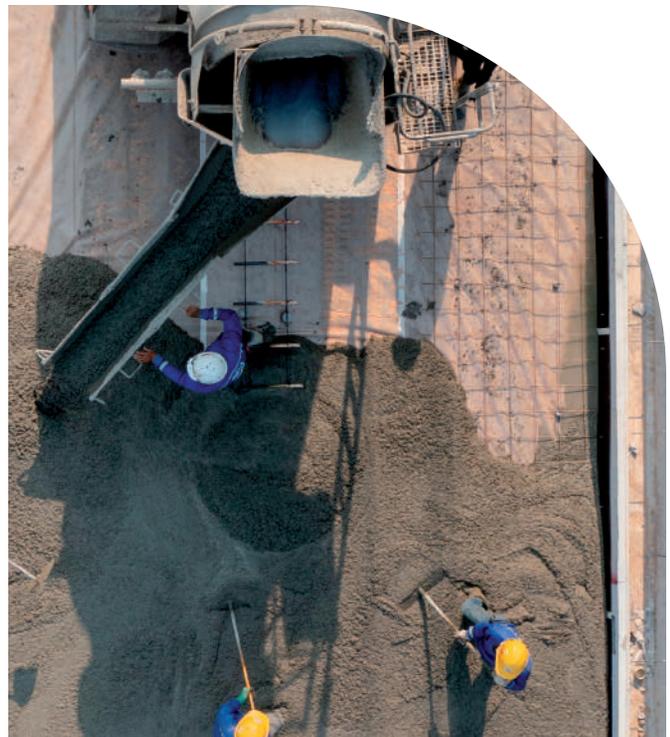

POLICEM GA: POLICEM GA Series products are a cement additive that is used as grinding aid for all cement types. Increases dispersion and grinding efficiency. Resolves pack set problem and increases mill capacity. Grinding aids neutralizes coagulation forces. Provides energy savings.

MINERAL GRINDING CHEMICAL ADDITIVES

POLIMINERAL GA: Series products are a mineral grinding chemical that is used as grinding aid for mineral, coal, calcium carbonate, limestone, silica, calcium oxide etc. They are also chemical additives developed for grinding minerals used for food. Increases grinding efficiency. Provides energy savings. Reduces mineral grinding costs. Decreases the agglomeration of mineral particles.

CHROME (VI) REDUCING

POLICR: Series products are the chrome reducing agent that transforms Cr (VI) into Cr (III) for all cement types, during cement hydration by acting on soluble chromates. In all types of cement, it is used to reduce Chromium (VI) below 2 ppm during production
